

# Perfect for assembly and workstation applications

The Ergonomic Series scissor lifts are a versatile production tool. Offered in 2000, 4000, and 6000 lbs. capacities with a variety of travels and platform sizes, these quality constructed scissor lifts make ideal work stations for assembly or welding processes. They also provide an economical means to decrease worker fatigue and injury.

## Standard Features

- Hand tool removable pins and bushings for ease of maintenance
- Needle bearing cam followers for smooth motion and longer life
- 1 hp internal power unit with optional power units available
- Hand pendant controller with 10 foot leads
- Heavy-duty 3/4" steel plate scissor arms

## CUSTOM DIE HANDLING SCISSOR LIFTS

*The Ergonomic Series is the foundation for many custom lift tables. We specialize in constructing the equipment to provide efficiency at the workplace while providing the worker the ergonomic tool to eliminate the bending, twisting and lifting commonly found in many applications. Our robust construction and customized designs have led to the success of our lift tables in multiple environments and throughout a wide variety of industries. With our multiple configurations and designs we are able to create the proper piece of equipment to suit almost any of your die handling or assembly applications.*
